Reatec is a self-adhesive film with over 1000 designs which can be applied like a wallpaper to any flat smooth surface. It is an advanced architectural, building, construction and interior design product and is excellent for new and renovation projects.

REATEC self- adhesive film is the modern way to decorate not only for new construction and décor projects but also to resurface, refresh, refinish and modernise existing outdated and discoloured surfaces. It is an ideal alternative to and far more durable than wallpaper.

Re-use old substrates and surfaces by transforming them and giving them an entirely fresh, new, modern look and feel. Adapt and re-use instead of demolishing and replacing. Why replace when you can upgrade.

Reatec adhesive architectural film can be applied directly on top of existing surfaces bringing new life to outdated surfaces.

One can change surfaces from wood to metal, metal to leather, leather to stone and then back again. One's choices are endless. Choose a film which looks like wood, marble, metal, stucco, concrete, rust, stone, fabric, leather, fantasy, Japanese or plain colours.

The Reatec film can be applied to almost any smooth substrate and can be stretched to adhere to curves and wrapped around corners.

And there are additional advantages

Lower cost, light weight, quick installation, no downtime, no waste, no noise, no dust, easy to repair, easy to clean and cuts down on landfills. The product is sustainable and eco - friendly. It is fire-retardant and Leeds approved. It is anti - bacterial, anti-mould, washable, stain resistant, abrasion resistant, resistant to solvents and chemicals.

REATEC is being used in an endless range of sectors and areas and has specific application for

**Walls**

**Ceilings**

**Hallways**
